AP Computer Science A (S1 & S2)

Beginning Programming S1 & S2

Fundamentals of Web Design**

Intermediate Programming S1 & S2

Marketing

International Business**

Media & Communications**

Sports and Entertainment Marketing**

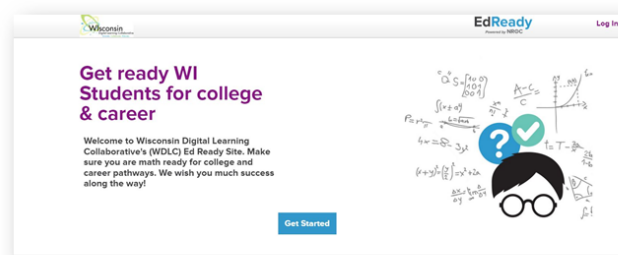

Note: Students enrolled in any WVS *WI Career Cluster Pathway Courses* may be interested in a **FREE** EdReady Math Pathways Course (math readiness course for a particular career pathway).

“EdReady is a math readiness system to help students avoid the time and cost of remedial courses in colleges. Depending on how your institution will configure EdReady, your students may use EdReady to:

- Determine their readiness to take college-level math courses.
- Follow a personalized study path to master specific concepts in math.
- Prepare for specific standardized exams, such as the ACT®, SAT®, Accuplacer®, or Compass®.
- Help manage and achieve academic and employment goals.

EdReady is based around the concept of “goals” - what students want to achieve. Within those goals, students take an assessment or two to understand where they stand in relation to their goal and then pursue a personalized study path based on their diagnostic results – enabling students to study and develop the necessary skills and knowledge to achieve their goals.”

Here’s a look at the [Wisconsin Digital Learning Collaborative \(WDLC\) Ed Ready](#) login page. For a quick “student look” view this [video](#).

Our [Virtual School Leadership Alliance](#) partner Montana Digital Learning Academy is on their 4th year of implementation [Montana Ed Ready](#) with Montana schools and the results are very promising. [Read more on their findings and others.](#)

[EdReady Pathways](#) is a powerful tool for career readiness, in addition to college readiness. To help support members in using EdReady with students who are pursuing a career-focused path of study, there is EdReady Pathways.

The pathways are **152 assessments** available to schools that have students in WVS courses. Just like the other assessments available in EdReady, the assessment scope has been pre-populated with EdReady's math subject experts' recommendations.

EdReady English is now available! Want to learn more about WDLC EdReady Math or English? Call WVS at 715-453-1953 between 8:00 AM and 4:00 PM CST, Monday-Friday (excluding holidays) or email us at wvshelpdesk@cesa9.org. Primary contact for implementation: WVS Executive Director, Dawn Nordine, dnordine@cesa9.org.
